ABOUT LUNG CANCER

Lung cancer can affect anyone, regardless of gender, ethnicity, or smoking history. About 60%-65% of all new diagnoses are among people who have never smoked or are former smokers. Lung cancer takes more lives annually than colorectal, breast, and prostate cancers combined.

ABOUT LUNGEVITY

LUNGevity Foundation is firmly committed to making an immediate impact on quality of life and survivorship of people with lung cancer by accelerating research into early detection and more effective treatments. LUNGevity provides community, support, and education to all those affected by the disease.
